AN INTRODUCTION TO THE KASANKA NATIONAL PARK

① Location:

Kasanka National Park extends over some 400 km² and lies in northern Serenje District, Central Province in Zambia. It lies on the southern rim of the mighty Bangweulu Basin, with the Congo (D.R.) just beyond its western boundary. The town of Serenje, off the Great North Road, is located just 70 km due south of the park. (Lies between 30°00' and 30°22' E; 12°55' and 12°40' S)

② Geographical features:

Kasanka is predominantly flat terrain, ranging from 1160 m at the point where the Luwombwa River exits in the north, to just 1290 m at Mpululwe Hill in the south-east. The park's principal drainage is provided by the Luwombwa River and its tributaries, the Mulembo, Kasanka, Musola, Mulaushi and Kabumba. The Luwombwa rises on Mount Mumpu on the Congo border, enters and then exits the park where it pours its waters into the Luapula River. There are seven lakelets in the park, not all of which hold water throughout the dry season, especially after poor rains. The largest is Wasa Wa Mkunyu, then Wasa Wa Mukongolo, Kalamba 1 and 2, Ndolwa, Chitwe and Chisamba Wa Mponde. The water bodies rely on runoff during the rains and are neither fed nor drained by streams. The river floodplains are dotted with seasonal pools and oxbow lakes.

③ Climatic influences:

The bulk of the rains fall in the summer months - November to April - with an annual average of 1100 mm. A low of 750 mm was recorded in the 1999 / 2000 season and a high of 1530 mm in 2000 / 2001. Because of the park's relatively high altitude temperatures tend to be pleasanter than for example in the lower lying Luangwa Valley to the south. Temperatures may fall to single digits during the dry winter months.

④ Vegetation:

The park can be broadly divided into eight vegetation types or zones but by far the most widespread is the Miombo woodland.

2

1- Miombo woodland

Miombo is defined as woodland dominated by trees of the related genera *Brachystegia*, *Julbernardia* and *Isoberlinia*. It varies from well grown woodland with a continuous canopy of 15 to 20 m height, to areas of shallow soils with stunted trees 5 m or so in height. The largest tracts of well grown miombo woodland are in the east, south and far west of the park, dominated largely by *Julbernardia paniculata* (Mtondo) or particularly in the wetter areas *Isoberlinia angolensis* (Mutobo).

2- Chipya

This is a kind of degenerate forest, growing in wetter places with deeper soils. The ground layer is characterised by long grass, bracken, *Afromomum* (wild ginger) and the thorny straggler *Smilax kraussianna*. The trees here are taller, up to 25 m, typified by *Erythrophleum africanum* (Kayimbi), large *Parinari curatellifolia* (Mpundu), *Pterocarpus*

angolensis (Mukwa or Mulombwa), *Terminalia mollis* and others, but apart from a few large *Brachystegia spiciformis* no “miombo” species.

3- Miombo / Masuku

Where the soils are shallower and growth is poor, particularly in large parts in the north of the park, a kind of secondary vegetation replaces the miombo, dominated by *Uapaca kirkiana* (Masuku) of around 5 m height. Although there has been no human habitation in the park since its founding in 1945 as a game reserve, many of these areas of secondary growth are old village and cultivation sites, which after 50 years have still not fully regenerated and perhaps never will due to altered soil structure.

4- Dry Evergreen Forest

There are a few remnant patches of dry evergreen forest with similar tree species to the Chipya but with an interlocking canopy and dense woody undergrowth, a type of thicket known as ‘mateshi’. Such vegetation occurs at Musande near the Luwombwa river, and the Katwa forest, an interesting isolated little block of forest near the Kasanka / Mulembo confluence.

5- Gallery Forest

There are strips of riverine or gallery forest fringing most of the river banks, typified by the tree *Khaya anthotheca* (Mululu, or Red Mahogany) or *Erythrophleum suaveolens* (Mwafi) where there are dry banks, but *Syzigium cordatum* (Mufisnsa, Musafwa) where swampy.

6- Mushitu

There are just two extensive patches of true Mushitu or swamp forest, one about 1 km long, the other 3 km in length at the Kasanka / Musola confluence. These consist mainly of 30 m tall *Syzigium cordatum* and fig trees, *Ficus trichopoda*. The drier fringes of this Mushitu are dominated once again by Mululu *Khaya nyasica*.

7- Wetlands

Extensive floodplains are associated with most of the rivers and lakes, and are variously covered with grasses, reedbeds and forest clumps on termite mounds. There are fairly extensive papyrus beds in a few places, particularly in the southern section of the Kasanka river, this is the Kapabi swamp. The extend of papyrus varies over the seasons depending on ground water level. Also along the Kasanka towards Kapabi there are some open short grass flats heavily grazed by Puku, with muddy pools which are particularly good for waders.

8- Grasslands

There are a few wide stretches of open grassland which are dry except for short periods of inundation at the height of the rains and maybe some small remaining water holes. The best examples are Chikufwe, Nafulwe and Salia plains.

⑤ Animal Life:

If one considers the small size of Kasanka it has an amazingly high diversity of vertebrate and invertebrate species. This, in part, can be explained by its proximity to the Congo and the Bengweulu basins. Although Hook-lipped Rhinoceros and Lion no longer occur in the

area, Elephant, Buffalo and Leopard still do. Recent research has given us a fairly complete picture of both the mammal and bird fauna but much remains to be discovered on the lesser vertebrates and most especially the invertebrates. At the time of writing we now know that at least 95 species of mammal, 413 birds, 38 reptiles, 26 amphibians, 63 fish, 19 dragonflies, 51 butterflies and 37 different spiders occur in the park. However, we know that these inventories, with further collection and research, are set to be considerably expanded, especially in the case of the fish and invertebrates.

⑥ **Human impacts and influences:**

Kasanka lies in an area with relatively high human settlement, extensive slash and burn cultivation but minimal livestock husbandry. Two human influences have negative impacts on the park management, fire and poaching. The latter involves active hunting and snaring for red meat, and fishing with nets, baskets or hook and line. Current management is such that illegal activities are kept to a minimum. Fires set by poachers, or those set near the park boundaries by farmers to clear land, are more difficult to manage and have often to be left to run their course. To reduce the impact of illegal burning, fire is used as a management tool during the period when then least long-term damage to the vegetation is likely.

HOW TO USE THESE CHECKLISTS AND KEYS:

Habitat:

Where possible we have given an indication of the range of the animals within Kasanka. We are well aware that some species occur in all habitats, others are highly restricted. Some are most likely to be found in a particular habitat but on occasion may be found in others. For example, Sitatunga are by and large restricted to the swamp and other wetlands but on occasion they may be seen in the woodland, especially at night.

WL = Woodland
R = Riparian woodland
G = Grassland
H = Hills
SW = Swamp / Marsh / Wetland
All = All

Abundance / Status:

The categories we have selected to indicate level of abundance are of necessity very broad. However, they at least give you a notion of what to expect to see easily, not so easily or only if you are lucky! In the case of some species, especially invertebrates, abundance is poorly, or not known at all. In the case of birds a number of species are African migrants, moving to different regions of the continent in different seasons.

V = Vagrant
R = Rare
UC = Uncommon
FC = Fairly common
C = Common

Your notes:

- 5 We have left a column for you to tick your personal sightings. After each group, e.g. mammals, we have left space for you to add new sightings and to make field notes.

Comment:

Invertebrate groups are still in the infancy of attention in Kasanka National Park. The lists of butterflies, dragonflies and spiders are far from complete and no indication is available on the diversity of other groups but this is expected to be particularly great.

MAMMAL CHECKLIST - KASANKA NATIONAL PARK

Kasanka has a very rich mammal fauna with 95 species recorded to date. Over time and with further surveys this can be expected to rise to about 124 species, particularly from groups such as bats, insectivores and small rodents. Early game department records (prior to 1960) indicate that species such as Eland (*Tragelaphus oryx*), Wild Dog (*Lycaon pictus*) and Cheetah (*Acinonyx jubatus*) once occurred in and around the park. Records of the occurrence of Oribi (*Ourebia ourebi*) and Tsessebe (*Damaliscus lunatus*) within the park boundary have not been verified, although introductions were made of Tsessebe in 2002. Animals were caught in the Bengweulu area to the north of the park. It would seem that the appearance of these antelope in game department reports actually refers to their presence on the Mukuku (Kalasa Mukoso) Flats to the north-west of the park, a natural extension of the Bangweulu floodplain.

The Bemba language does not differentiate individual species in a number of cases. For example all shrews are called *Mununka*, all fruit bats are *Mwilima* and insectivorous bats are *Kansuswa*. Despite our best efforts we have been unable to track down Bemba names for a number of larger species.

Common name (Bemba)	Scientific name	Status	Habitat	✓
INSECTIVORES:				
Greater Dwarf Shrew (Mununka)	<i>Suncus lixus</i>	R	G	
Lesser Red Musk Shrew (Mununka)	<i>Crocidura hirta</i>	FC	SW

MAMMALS STILL POSSIBLE FOR KASANKA

Common Name	Scientific Name
Greater Grey-Brown Musk Shrew	<i>Crocidura luna</i>
Musk Shrew	<i>Crocidura turba</i>
Otter shrew	<i>Potamogale velox</i>
Dobson's Epauletted Fruit Bat	<i>Epomophorus dobsoni</i>
Mauritian Tomb Bat	<i>Taphozous mauritanus</i>
Greater Slit-faced Bat	<i>Nycteris macrotis</i>
Yellow-winged Bat	<i>Lavia frons</i>
Rüppell's Horseshoe Bat	<i>Rhinolophus fumigatus</i>
Rufous Hairy Bat	<i>Myotis bocagei</i>
Butterfly Bat	<i>Glauconycteris variegata</i>
Giant Yellow House Bat	<i>Scotophilus nigrita</i>
Damara Woolly Bat	<i>Kerivoula argentata</i>
Nigerian Free-tailed Bat	<i>Tadarida nigeriae</i>
Little Free-tailed Bat	<i>Tadarida pumila</i>
Striped Weasel	<i>Poecilogale albinucha</i>
Bushy-tailed Mongoose	<i>Bdeogale crassicauda</i>
Meller's Mongoose	<i>Rhynchogale melleri</i>
African Wildcat	<i>Felis libyca</i>
Lord Derby's Flying Squirrel	<i>Anomalurus derbianus</i>
Grey Climbing Mouse	<i>Dendromus melanotis</i>
Savanna gerbil	<i>Gerbilliscus validus</i>
Nyika Bush Rat	<i>Aethomys nyikae</i>
Kaiser's Bush Rat	<i>Aethomys kaiseri</i>
Broad-headed Mouse	<i>Zelotomys hildegardeae</i>

BIRD CHECKLIST - KASANKA NATIONAL PARK

The number of bird species recorded in the park at the time of writing is 414, with at least 62 that may be added with further observations, especially during the rainy season. This is the time when mobility is limited and the least number of people visit the park. Especially rewarding areas should prove to be in the swamps and riverine zones. The presence of the Shoebill (*Balaeniceps rex*) in the park is apparently based on one sighting and requires confirmation.

REPTILE CHECKLIST

The reptile fauna of Kasanka is neither particularly rich, nor diverse, yet representative of the miombo woodland fauna. The presence of the Slender-snouted Crocodile (*Crocodylus cataphractus*) is based on an old record and this needs to be confirmed as this places it on the southernmost limit of its range.

English name	Scientific name	Status	Habitat	✓

	<i>Acraea egina egina</i>
	<i>Acraea acara acara</i>
Small Orange Acraea	<i>Acraea eponina</i>
Family LYCAENIDAE:	
Woolly-Legs	<i>Lachnocnema bibulus</i>
Hair Tail	<i>Anthene crawshayi crawshayi</i>
	<i>Leptotes babaulti</i>
	<i>Leptotes jeanelli</i>
	<i>Leptotes pirithous pirithous</i>
	<i>Euchrysops osiris osiris</i>
	<i>Euchrysops malathana</i>
	<i>Abisara rogersi dollmani</i>
Long-tailed Blue	<i>Lampides boeticus</i>
	<i>Pseudonacaduba sichela sichela</i>
Blue	<i>Azanus moriqua</i>
Azure Hairstreak	<i>Iolaus caeculus caeculus</i>

SPIDERS OF KASANKA

Many of the spiders collected in Kasanka have only been identified to genus and even family level. This is mainly because the arachnid fauna of the region is poorly known and many may have not been previously described.

Common Name	Scientific Name
Family ARANEIDAE:	
Orb Web Spider	<i>Neoscona vigilans</i>
Orb Web Spider	<i>Neoscona blondeli</i>
Orb Web Spider	<i>Neoscona penicillipes</i>
Orb Web Bark Spider	<i>Caerostris sexcupidata</i>
Orb Web Spider	<i>Araneilla sp.</i>
Kite Spider	<i>Gasteracantha falcicornis</i>
Hairy Field Spider	<i>Araneus sp.</i>
Garden Orb Web Spider	<i>Argiope flavipalpis</i>
Family CORINNIDAE:	
Ant Mimic	<i>Medmassa sp.</i>
Sac Spider	<i>Copa benina</i>
Family CTENIDAE:	
Tropical Wolf Spider	<i>Ctenus sp.</i>
Family GNAPHOSIDAE:	
Ground Spider	<i>Setaphis sp.</i>
Family HERSILIIDAE:	
Long Spinnered Bark Spider	<i>Hersilia sp.</i>
Long Spinnered Bark Spider	<i>Hersilia sp.</i>
Family IDIOPIDAE:	
Trapdoor Spider	<i>Idiops sp.</i>
Family LYCOSIDAE:	
Wolf Spider	<i>At least 3 species</i>
Family MITURGIDAE:	
Sac Spider	<i>Cheiracanthium sp.</i>
Family PHOLCIDAE:	

Common Name	Scientific Name
Daddy Long Legs	<i>Smeringopus peregrinus</i>
Family PISAURIDAE:	
Nursery Web Spider	<i>Euprosthonops bayaonianus</i>
Family SALTICIDAE:	
Jumping Spider	<i>Cembalea sp.</i>
Jumping Spider	<i>Holcolaethis sp</i>
Jumping Spider	<i>Thyene imperialis</i>
Dandy Jumping Spider	<i>Portia sp.</i>
Jumping Spider	<i>Tusitala barbata</i>
Family SELENOPIIDAE:	
Wall Spider	<i>Selenops sp.</i>
Wall Spider	<i>Selenops radiatus</i>
Family SPARASSIDAE:	
Huntsman	<i>Olios sp.</i>
Large Huntsman Spider	<i>Palystes sp.</i>
Family TETRAGNATHIDAE:	
Large-jawed Water Orb-web Spider	<i>Tetragnatha maxillosa</i>
Family THERAPHOSIDAE:	
Baboon Spider	new
Family THERIDIIDAE:	
Gumfoot-web Spider	<i>Achaearaneae sp.</i>
Family THOMISIDAE:	
Crab Spider	<i>Thomisus australis</i>
Flower Crab Spider	<i>Thomisus daradioides</i>
Crab Spider	<i>Firmicus sp.</i>
Crab Spider	<i>Synema sp.</i>

COMMON & MORE EASILY IDENTIFIABLE TREES IN KASANKA:

S = swamp forest

R = riverine forest

T = termitaria islands

C = chipya woodland

B = Baikiaea woodland

D = Dambo fringes

M = Miombo woodland

Mu = Mushitu

Ma = Mateshi

Common Name (Bemba Name)	Scientific Name	Loc.
Wild Date Palm (Kanchindu)	<i>Phoenix reclinata</i>	S,R,T
Cape Fig (Mukunyu)	<i>Ficus capensis</i>	S,T
Sycamore Fig (Mkunyu)	<i>Ficus sycamorus</i>	C
Swamp Fig	<i>Ficus trichopoda</i>	S,R
Red Milkwood (Mubungabunga)	<i>Mimusops zeyheri</i>	T
Quinine Tree (Mwimbi)	<i>Rauvolfia caffra</i>	R
White Thorn (Munganunshi)	<i>Acacia sieberana</i>	S, R
Hook Thorn (Munganunshi)	<i>Acacia ptyacantha</i>	D, R
Sickle Bush (Kansalonsalo)	<i>Dichrostachys cinerea ?</i>	B
Wild Rose (Musombo)	<i>Oncoba spinosa</i>	T
Lucky Bean (Mulunguti)	<i>Erythrina abyssinica</i>	C, M
Bush Orange (Kasongole)	<i>Strychnos cocculoides</i>	M
Elephant Orange (Sansa)	<i>Strychnos spinosa</i>	M
(Pupwe)	<i>Zanthoxylum cholybeum</i>	T
Kangwa (Kalanangwa)	<i>Ziziphus abyssinica</i>	C, T
Mufumbe (Mufumbe)	<i>Piliostigma thonningii</i>	M
Mufutu (Mufutu)	<i>Vitex doniana</i>	T
Pod Mahogany (Mupapa)	<i>Azelia quanzensis</i>	R
(Musumku)	<i>Brachystegia alleni</i>	M
(Musompa)	<i>Brachystegia manga</i>	M
(Ngansa, Musamba)	<i>Brachystegia boehmii</i>	M
(Mukongolo)	<i>Brachystegia bussei</i>	M
(Chifwanga)	<i>Brachystegia floribunda</i>	M
(Muombo)	<i>Brachystegia longifolia</i>	M
(Muputu, Msasa)	<i>Brachystegia spiciformis</i>	M
	<i>Brachystegia stipulata</i>	M

Common Name (Bemba Name)	Scientific Name	Loc.
(Ngalati)	<i>Brachystegia taxifolia</i>	M
(Musaka)	<i>Brachystegia utilis</i>	M
Long-pod Cassia (Munsokansoka)	<i>Cassia abbreviata</i>	T
(Mutobo)	<i>Isoberlinia angolensis</i>	M
(Mpassa)	<i>Julbernardia globiflora ?)</i>	M
(Mutondo, Munondo)	<i>Julbernardia paniculata</i>	M
Red Mahogany (Mululu)	<i>Khaya anthotheca</i>	R
Sausage Tree (Mufungufungu)	<i>Kigelia africana</i>	M, D
(Muonga)	<i>Oldfieldia dactylophylla</i>	D
Live-long (Kabumku)	<i>Lannea discolor</i>	M
Lilac Tree (Chiya)	<i>Lonchocarpus capassa</i>	C, M
(Mwanga, Mubanga)	<i>Pericopsis angolensis</i>	M
(Mukwa, Mulombwa)	<i>Pterocarpus angolensis</i>	M
Flat-crown Albizia (Mutanga)	<i>Albizia adianthifolia</i>	M
Wild Pear (Mukole)	<i>Dombeya rotundifolia</i>	M
(Mupasa, Mutumbwa)	<i>Maprounea africana</i>	M
Cluster-head Sugarbush (Musoso)	<i>Protea welwitschii</i>	M
Sugarbush (Musoso)	<i>Protea gaguedi</i>	M
Hairy Cluster-leaf (Mubobo)	<i>Terminalia mallis</i>	M, C
Wild Loquat (Musuku)	<i>Uapaca kirkiana</i>	M
Narrow-leaved Mahobohobo (Musokolowe)	<i>Uapaca nitida</i>	M
	<i>Uapaca sansibarica</i>	M
Bushwillow (Mutala)	<i>Combretum celastroides</i>	M
(Mufuku)	<i>Combretum collinum</i>	M
Fragrant Bushwillow (Mulamana)	<i>Combretum fragrans</i>	M
Velvet-leaved Bushwillow (Montamfumu)	<i>Combretum molle</i>	M
Large-fruited Bushwillow (Mufuka)	<i>Combretum zeyheri</i>	M
Wild Avocado	<i>Parinari excelsa</i>	R
Musepa	<i>Parkia filicoidea</i>	Mu
African Ebony (Muchenja)	<i>Diospyros mespiliformis</i>	Mu
Mufutu	<i>Vitex doniana</i>	Mu
Monkey Orange (Mukome)	<i>Strychnos pungens</i>	M
Waterberry (Mufinsa)	<i>Syzgium cordatum</i>	S, R
Waterberry (Mufinsa)	<i>Syzgium guineense</i>	S, M

Common Name (Bemba Name)	Scientific Name	Loc.
	<i>macrocarpum</i>	
Mobola Plum (Mupundu)	<i>Parinari curatellifolia</i>	Ma?
Mahogany (Mofu)	<i>Entandrophragma delevoyi</i>	Ma
Ordeal Tree (Kayimbi)	<i>Erythrophleum africanum</i>	C
	<i>Smilax anceps</i>	C
	<i>Pteridium aquilinum</i>	C
Mubanga	<i>Pericopsis angolensis</i>	C
Kabumbu	<i>Lannea discolor</i>	C
Mwenge	<i>Diplorhynchus caudylocarpa</i>	C
Wild Plum (Blue Sourplum) (Mulebe)	<i>Ximenia americana</i>	
Jujube (Kalanangwa)	<i>Ziziphus abyssinica</i>	
Glossy Flat-bean (Kalongwe)	<i>Dalbergia nitidula</i>	
Golden Bean Tree (Musalankwale)	<i>Markhamia obtusifolia</i>	
Musepa	<i>Parkia filicoidea</i>	
African Wattle (Mwikalankanga)	<i>Peltophorum africanum</i>	
Rough-leaved Shepherd's Tree (Muembembe)	<i>Boscia angustifolia</i>	
African Ebony (Muchenja)	<i>Diospyros mespiliformis</i>	
Museshi	<i>Marahesia macroura</i>	
Chimpampa	<i>Monotes elegans</i>	
Mutala	<i>Combretum celastroides</i>	
Large-flowered Gardenia (Mulwalwalwa)	<i>Rothmannia whitfieldii</i>	
Cape Willow (Mupula)	<i>Salix mucronata (subserrata)</i>	
	<i>Acacia pilispina</i>	D

Lists were compiled by: (in 2003)

Mammals: C. & M. Stuart, Kasanka Trust

Birds: Modified from original checklist by Bob Stiernstedt, with additional records (Peter Leonard, J.Carlyon, Kasanka Trust)

Reptiles: C.& M. Stuart, input by Wolfgang Boehme (KM Bonn)

Amphibians: C. & M. Stuart); input by Alan Channing (UWC)

Fish: C. & M. Stuart, Roger Bills

Dragonflies & Damselflies: Michael Samways; collection C. & M. Stuart

Butterflies: Ernest Pringle; collection C. & M. Stuart

Spiders: Ansie Dipenaar; collection C. & M. Stuart

Common trees: C. & M. Stuart

We would be very pleased to receive new and interesting records on the animal life in order to constantly update these lists.

In this series:

- The Wildlife of Loxton, Central Karoo, South Africa.
- The Wildlife of “Slypfontein” and “Spes Bona”, Central Karoo, South Africa
- Checklists for the Fauna of the Western Soutpansberg, Northern Province, RSA.
- Checklists of the Wildlife (and Trees) of Prince Albert and Environs, RSA.
- Checklists of the Wildlife of Melton Wold, Central Karoo, South Africa
- Preliminary Checklists of Vertebrates in the vicinity of Shoebill Camp, Zambia.
- Preliminary Checklists of the Fauna and Flora of Lake WakaWaka, Zambia.
- Checklists of the Fauna and Flora of Kasanka National Park, Zambia.
